WORK EXPERIENCE

Software Engineer

Tekvek   Aug - 2023 - Present

As a software engineer in web development, I specialized in full-stack technologies, handling both front-end and back-end web development tasks. My role involved creating responsive user interfaces and scalable server-side solutions, contributing to the overall success of web projects.

Full Stack developer

Fiverr   2020 - 2023

As a full-stack developer at Fiverr, I leverage the latest web technologies to create robust, end-to-end solutions for diverse clients. I'm dedicated to delivering top-notch products and staying current with emerging web technologies to provide innovative and quality-driven results.

MERN Stack Developer

AIMs Technologies   Feb 2022 - Jan 2023

As a dedicated MERN stack developer, I excel in web development, leveraging the MERN technology stack to create top-notch products. My focus is on consistently delivering high-quality solutions, ensuring an exceptional user experience through innovative use of MERN technologies.

SELECTED PROJECTS

Travel Companion   Sep 2023 - Present

Next.js based website enabling travelers to search for restaurants, hotels, and places by ratings and names using Google Maps integration. Additionally, provided real-time weather information for each city, enhancing user experience and functionality.

UCOMEX   Aug 2023 - Present

Developed a Next.js website for a shipping company, optimizing cargo management and customer communication. Implemented features for calculating shipping costs, and providing real-time updates, improving efficiency and user engagement.

EaseWeb (Easy Website Builder)   Nov 2022 - Aug 2023

The Website Builder Application is a user-friendly platform that enables users to create their own websites using pre-designed templates in the form of sections.

ShareMe   Mar 2023 - May 2023

Web-based application that allows users to share their pictures and save pictures from others, like Pinterest. The application requires users to log in with their email to access the platform.
